LDDE | lighting ideas

T5 Colour mixing system 0-100%

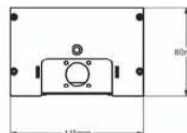

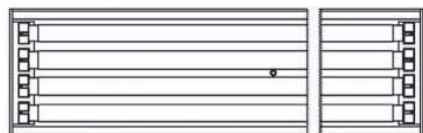

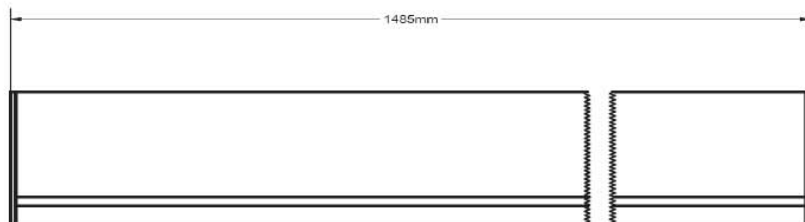

### World Premiere

SpectraConnectT5 is the worldwide first 0-100% dimmable T5 Colour mixing system. LDDE's new smooth\_operator® technology inside facilitates a fully supported brightness control at a high-speed response time (approx. 20 milliseconds). Due to this the SpectraConnectT5 provides very slow flicker-free fades as well as Flash and Stroboscope effects.

- T5 Colour mixing system
- 4 x 35W/T5 fluorescent tubes, RGBW
- DMX 0-100% soc
- Continuous dimming from 0-100%
- Internal 16bit resolution
- Absolutely flicker-free fades
- Digitally optimized colour mixing performance
- Separate control of colour and intensity
- Flash and Stroboscope (up to 25Hz)
- Optimized for TV transmission

### Technical specifications

Fluorescent tubes .....	4 x T5/35W RGBW
Control.....	DMX512
Control range .....	0-100%
Operating Voltage .....	220-240 V <sub>AC</sub> / 50Hz
Max. Power .....	170 W
Max. Input Current .....	800 mA
Temperature range .....	+10 .. +40°C
Protection class .....	IP20
Dimensions .....	1485mm x 115mm x 80mm
